

## PRODUCT OVERVIEW

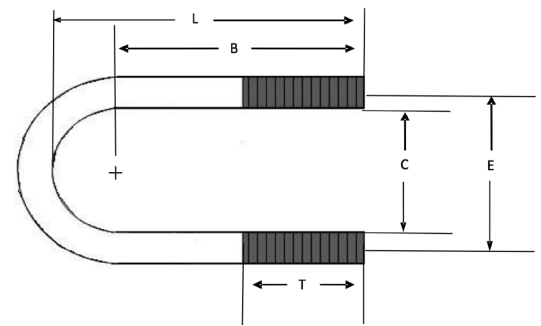

A U-Bolt is a U-shaped bolt with two threaded arms protruding from a curved base. U-Bolts are used heavily in building and construction. U-Bolts have primarily been used to support pipework. They are also commonly used to attach various items to poles and beams and can also be used as concrete fasteners.

AATP offers a wide selection of materials, finishes and sizes of Figure 137 U-Bolts. In addition to standard round bend U-bolts, we can also manufacture special U-Bolts with custom sizes, bends and configurations.

- **Pipe Size:** 1/2" to 16"
- **Rod Diameter:** 1/4" to 1"
- **Materials:** Low Carbon Steel, T304 Stainless, T316 Stainless
- **Finishes:** Plain/Oil, Clear Zinc Plated, Hot-Dip Galvanized
- **Threads:** Coarse
- **Applications:** Framing systems, Petroleum and Chemical Industry, Automotive Industry, Power transmission field, Piping and conduit supports, Plumbing/HVAC
